UNSOLVED PROBLEMS FOR 5G IoT

5G

No common framework to track all the different data types and configurations required to operate a Smart City

Different IoT sensors must have their data routed to different Edge and Cloud compute platforms

5G operators must meet US government CMMC for CUI NIST 800-171 logging requirements

XQ MONITORS ENCRYPTED DATA FROM ALL PLATFORMS ON ONE MANAGEMENT DASHBOARD

TESTIMONIALS

"We're building the Smart Community of the future and needed IoT security and management - we got both with XQ"

- Sean Hendrix Director Indiana 5G Zone

"This app is simply amazing. Use it to secure your messaging with your teams and networks!"

- Matthew Murray, Former Deputy Assistant Secretary of Commerce for Eurasia

"As a nationwide Mortgage Banker our need for data security is incredibly important. Not only are we impressed with the work XQ has already done but we also are excited to bring some projects together that before seemed unattainable. A smart and responsive technology company that is able to fill a gap that is currently missing in the Information Security industry."

- Duanne Kibbee, VP Technology, American Financing
